## Education

### AJOU University in Tashkent

Bachelor's Student in Electrical and Computer Engineering

Tashkent

2023-present

## PROJECT EXPERIENCE

Tashkent

Frontend Developer

(2025 – present)

### E-Commerce Web Application

2024

- An e-commerce web application has been created based on Next.js and Supabase, where users can register and view products.
- The functionality to add and delete products through the admin panel has been developed.
- A modern and responsive design has been created using Tailwind CSS.

### AUT Library – Online Library system

2025

- I have developed a modern online library platform that can store over 1000+ books.
- I have provided users with the ability to search, view, and download books in PDF format.
- The frontend has been built using Next.js and Tailwind CSS, following a modern and responsive design.
- The backend is written in Python Django, implementing user authentication and database management.
- Goal: To create an easy, fast, and convenient library system for all students of AJOU University.

### CommVenture – Web-game Project

2025

- I developed an interactive web project aimed at adding hundreds of new volunteers to the IT Community of Uzbekistan.
- I built the frontend using Next.js and Tailwind CSS, utilizing various CSS animations and interactive effects to enhance the user experience.
- For creating the game graphics, I used modern graphic design tools (such as Adobe Illustrator and Figma), crafting a visually appealing and user-friendly interface.
- I took full responsibility for managing and successfully completing the project, creating an interactive and engaging mini-game to attract new volunteers.
- As a result, the game allowed users to easily register and helped bring 100+ volunteers to the IT Community of Uzbekistan. Through the game, I streamlined the process of adding new members to the system interactively.
- The successful implementation of the project strengthened my experience and skills in encouraging community membership and project management.

## LEADERSHIP EXPERIENCE

### AUT Library Project – Team Lead

AJOU University in Tashkent | 2025 Mart

- I led the development process of an online library system with a team of 4 members.
- I coordinated team activities and effectively distributed frontend and backend tasks.
- I ensured the successful completion of the project by setting weekly meetings and deadlines.
- I provided guidance to the team in making technical decisions and monitored the quality of the final product.

### TEDxAJOUTashkent – Official Website Developer & Technical Coordinator

AJOU University in Tashkent | 2025 April

- I led the development of the official website for the university's first TEDx event.
- I collaborated with the technical team to successfully integrate sections for information, speakers, sponsors, and the program into a unified system.
- I studied the official TEDx guidelines and implemented them to ensure compliance with TEDx requirements.
- I coordinated with other team members, contributing significantly to managing the work and completing it on time.

## **IT Community Uzbekistan – Mini-game Project Manager**

Toshkent | 2025 April

- I worked as the project manager for creating an interactive mini-game aimed at registering new volunteers.
- I used modern technologies such as Next.js and Tailwind CSS to design the user interface and game layout.
- In collaboration with the team, I created the project plan and successfully developed and launched the mini-game.

## **INTERESTS|SKILLS**

---

### **Technical skills**

- Frontend: React.js, Next.js, JavaScript, TypeScript, HTML, CSS, SASS, Bootstrap, Tailwind CSS
- Backend: Python (Django), Java (Basic, procedural level), C (Basic, procedural level)
- Version Control: Git/GitHub

### **Additional:**

- Microsoft Office (Data analysis in Excel)
- Uzbek (Native)
- English C1
- Russian B1
- Korean B1

### **Interests:**

- Artificial Intelligence and Machine Learning – Interested in AI technologies and related research
